### INCORRECT

How often we see a home planted with a "hit or miss" group of evergreens! Take the above case for an example. It is a well-built home with studied perfection in construction, yet with a foundation planting which might be termed "a collector's gallery."

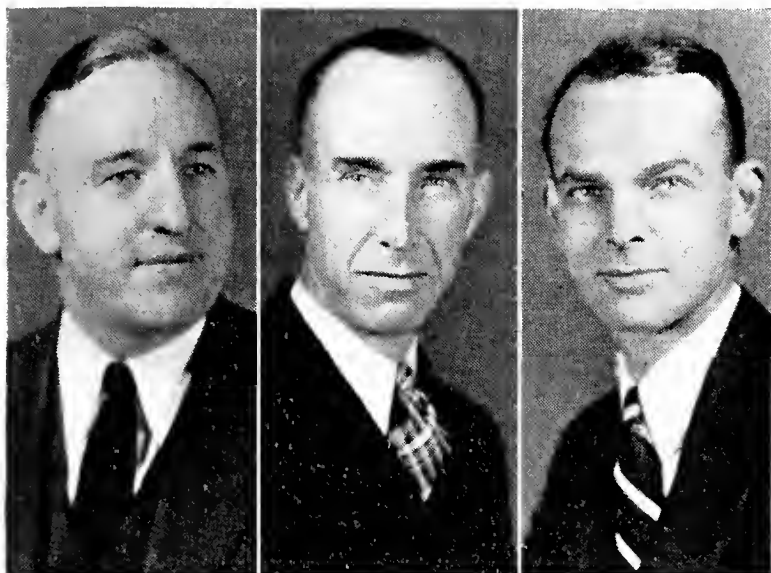

Note the total absence of a design which relates the planting to the architecture of the house. Add to this the use of fast-growing Spruces which have already covered the windows, and the discrepancies of this planting are readily seen.

### CORRECT

There is harmony in this picture. Instead of the eye following the restless "up and downs" of the previous planting, the more restful impression of unity between home and planting is present.

This impression is attained by placing the trees so that the low-lying, homelike characteristic is enhanced rather than its utilitarian height. Note, too, that the windows will never be covered; and how the porch is effectively screened and yet made an integral part of the finished picture.

### THE LANDSCAPE DEPARTMENT

Our planting designers are the key men in our landscape organization. Upon their knowledge and skill in arranging and grouping plant types depend the finished picture of the home.

One would not think of building a house without skilled carpenters and plans to go by. So our organization not only has trained men for developing plans but a carefully trained and supervised planting department to execute the plan and ideas approved by you.

These men know that each place must be treated individually. The planting treatment must be designed to bring out and accentuate the existing charm.

In order that the designer may do effective work, he must have a reliable organization back of him. We are justly proud of the type of men in our service. Some have been with us for over twenty years.

Here are a few reasons why we are qualified to help you:

1. Fifty acres of trees, shrubs, perennials, and evergreens to choose from. A perusal of this price list shows you the wide variety offered.
2. Forty-four years' experience as a background to help solve your problems.
3. An up-to-date and thoroughly equipped landscape department.
4. An experienced and dependable personnel. Our men remain with us year after year.
5. A liberal guarantee. See front page.

## Hardy Perennials

As the best effects are usually obtained by planting Perennials in groups of not less than three, we are offering them in that quantity, rather than singly. If only one plant is desired, the price will be one-third the rate for three.

Please note that five or more plants will be priced at the ten rate, and twenty-five or more at the one hundred rate.

Varieties marked with an asterisk (\*) are especially adapted for the Rock Garden.

Key to abbreviations used for color, height and period of bloom:

B-Blue, P-Pink, R-Red, W-White, Or-Orange, La-Lavender, Pu-Purple, Vi-Violet, Y-Yellow.

Ap-April, My-May, Jn-June, Ju-July, Au-August, Se-September, Oc-October.

Example:

*Achillea ptarmica*—W-2'-Au indicates white flower, grows two feet high and blooms in August.
